charge by EPA on August 5, 2015. EPA was then conducting an investigation of the Gold King River. The incident

and me the latest news releases on the subject? Thank you!

out the Colorado River – for our **1030am** show this morning. I realize this is an incredibly last minute request are there across the country? How does the EPA monitor the maintenance and condition of mines and dams that are at risk? Just want to see if I can get the latest from the EPA on the contamination.

report at the PBS NewsHour. We are doing a segment tonight on the Animas River in Colorado and the active spill and on drinking water. When will the water hit Lake Powell? Will this spill have an impact on drinking water and agriculture? **Are there any plans to file any criminal charges in response to the “obviously criminal” Gold King Mine incident?** How much water spilled into the Animas River on August 5? New reports are saying it is around 3 million gallons but is there any up stream contamination? How do I listen in on that call? I cannot seem to find anything on Region 8’s website or the main EPA website about the spill. Are you working on a story for VICE News on the Colorado gold mine wastewater spill. I was wondering if it would have any legal or health implications of the spill for the EPA under CERCLA. Will EPA be liable for the spill under CERCLA, or how does CERCLA apply?

Will the spill be cleaned up by an EPA cleanup crew? I'm working on a story that looks at potential implications under CERCLA. Deadline is 5 o'clock tomorrow to talk about the Colorado toxic spill? The interview will be about 5-6 minutes one on one with you.

the investigation was to assess the ongoing water releases from the Andover and to the EPA's water for cleaning up

est but would really appreciate your perspective on the issue. It could be via Skype and will take no longer
re holding contaminated water? Are abandoned mines, like Gold King, monitored?

pill in the region. We are wondering if the EPA is planning on making anyone available to the press today a
icultural water for other states. I am thinking this comes as a particularly bad time for California, which is already su
ent. I told him I knew of no such charges, but would seek additional info. Also, the reporter is asking whether sim
dated assessment showing which heavy metals might have been in the wastewater? Also, I need to know if an upd
out this.

be possible for you to connect me to someone at the EPA to talk about the spill, how it happened and wh
RCLA come into play in this scenario?

PM.

the spill? If further from the dignity. We'd like to speak a tent about the issue that had not raised 31436582

than 5 minutes. Please let me know if this might be possible?

about the situation. We would love to speak to someone either on the national or regional level. Judy Woodruff covering water emergency. Is this toxic spill going to impact water supplies in California? How long will it take to clean up? **Similar incidents have prompted criminal charges in the past. A question for OECA?** A statement or a written or a video or a printed press release has been issued by EPA's regional administrator Shaun McGrath with more information about the spill and what the consequences could be. A short telephone interview would be very helpful.

42 and try to get the time 30 pg 18
During the excavation, the loose material gave way, opening the adit (mine tunne

uff is the correspondent doing this interview. We would ask some basic questions about how this spill occu
up? Any impact on economy and drinking water supplies, if so for how many people?

e Gold King Mine Spill. I seem to be finding only week-old information at this point.

l) and spilling the water stored behind the collapsed material into Cement Creek, a tributary of the Animas River. In

red, how dangerous it is to the community, and what are the efforts already underway to curb the spill. Th

initial estimates are that the release contained approximately one million gallons of water (estimated from the dimen

en bigger picture questions about what a full cleanup will take, if there is a way to prevent future spills of t

sions of the mine adit) that was held behind unconsolidated debris near an abandoned mine portal. There were sev

his nature, and if you live near this river what you should be doing in the meantime. Please let me know as

eral workers at the site at the time of the breach, all were unharmed. The large pulse of water dissipated in about a

soon as possible if someone is available. We can be somewhat flexible on timing, but our ideal windows a

n hour. Today the water in Cement Creek and the Animas River in Silverton is clearing. The adit is still discharging l

re between 4:15pm EST – 5:15pm EST or live at 6:20pm EST.

ower flows into Cement Creek. Today, EPA is rebuilding settling ponds to treat these flows – the upper pond will be

completed by early afternoon, and the lower pond by COB or early tomorrow. EPA will treat the mine water diver

ted to the ponds with caustic soda and flocculent once the ponds are built. We expect conditions will continue to im

prove in the coming hours and days. As of 10 am today the leading edge of the plume was at 8 miles, as the crow f

lies (not river miles), from the New Mexico state line. We expect an update on that location later this afternoon. W

e will continue to coordinate with local, state, tribal and federal officials. EPA 's ASPECT (Airborne Spectral Photome

tric Environmental Collection Technology) arrived in Santa Fe, New Mexico, last evening to fuel up, and completed a

preliminary overflights to determine how far downstream the release has gotten. The flight crew flew this morning

from the New Mexico border to the mine to take photographs. The flight crew will fly the river again this afternoo

n. EPA is coordinating with ATSDR in response to public health concerns/questions associated with the mine waste

plume. ATSDR has been in communication with local health officials at San Juan County Basin Health Department i

n Colorado. Public health questions/concerns should be directed to Chris Poulet, ATSDR/R8 at 303-312-7013. EPA R

egion 8 has been coordinating with Region 6 and Region 9 and the states of Colorado, New Mexico, Utah and the S

outhern Ute Tribe. Region 6 is working closely with the New Mexico Environment Department to evaluate possible

impacts in New Mexico. Potentially impacted water systems have been notified and precautions are in place to en

sure drinking water in homes is protected. EPA and NMED are providing assistance to community water systems an

d closely monitoring the situation.
